Treatments & Dosages:

Option 1 Weekly Maintenance Dose: Best Proactive Saltwater Chemistry Available

- balance pool water: (refer to manufacturer specific guidelines for saltwater equipment)
- add 4 oz of PEPPER per 10,000 gallons directly to the pool.

Note: Lid of PEPPER bottle is approximately 2 oz

Option 2 Bi-Weekly Maintenance Dose:

- add 8 oz of PEPPER per 10,000 gallons directly to the pool.

Option 3 E-Z SOLUTION Automatic Daily Feed: Does the feeding for you!

- this method involves the use of a solution tank and chemical feed pump to automatically feed PEPPER solution into the pool daily.
- to make solution fill 30 gallon tank with fresh water and add 4# of PEPPER to the tank.
- set chemical feed pump to automatically feed .3 gallons of PEPPER solution per day per 10,000 gallons of pool water.
- refill tank with PEPPER solution as needed.

Option 4 Saltwater Pool Shock Dose:

- add 8 oz of PEPPER per 10,000 gallons directly to the pool as needed.
