

## FLOC & SHOCK: EXTREME CLEAN

Revive!® from APi is a multi-tasking flocculate and clarifier that can drop contaminants to the bottom of the pool within 24-48 hours. For Extreme Clean situations Revive! remains efficient and effective in chlorine levels up to 30ppm. Revive! drops contaminants to the pool floor which is heavier and easier to vacuum than traditional flocculants.

## CLEAR YOUR POOL FAST!

REV32  
CHF-50-314

1. Remove as much large debris as possible from the pool, with Net or Vacuum.
2. Brush all pool surfaces to loosen algae and debris.
3. Super chlorinate (Shock) pool to desired level.
4. Spray 64 oz of Revive! START UP/CLEAN UP per 24,000 gallons over the surface of the pool.
5. Turn pool pump off for 24-48 hours, pool will clear as debris settles to the bottom of the pool.
6. Once pool is clear, vacuum the debris to waste. If using cartridge filter, vacuum debris through the filter. Afterward clean cartridge element.
7. Resume normal pool operation & maintenance.

For Best Results: pH 7.0-8.0

Alkalinity <250ppm

Chlorine <25ppm

Multiple bottles of Revive! Can be used all at once if the pool is severely fouled.

Prior to treatment test pool water for treatment resistant elements that would require draining and refilling the volume of the pool, then adjust pH. Revive! removes organics, carbonates, metals, and phosphates, making it the best all-around product for fast clean up.

For pools contaminated with oils & other organics after Floc & Shock consider a weekly dose of EZymePRO®.
