

1. Physically remove as much debris as possible from the bottom of the pool. *(use a pool leaf net or vacuum, even if you can't see the bottom)*
2. Brush all walls & pool surfaces to break algae loose.
3. With the pump running shock the pool with: *(4# of Cal Hypo or 4 Gallons of Liquid Chlorine)* per 20,000 gallons of pool water.
4. Spray 32 oz of **Revive![®] START UP/CLEAN UP** per 24,000 gallons over the surface of the pool. *If algae issue is severe use the double dose (64 oz).*
5. Turn pool pump off for 24-48 hours. Water will begin to clear as contaminants and debris settle out to the pool floor.
6. Once water is clear, vacuum debris to waste *(if system allows)*. On cartridge filters, vacuum debris to filter then clean the cartridge element(s).
7. Resume normal pool filtration and chemical maintenance.
