

# 12 Features & Ways to use

## Enhanced Non-Chlorine Shock

- Concentrated Enhanced Non-Chlorine Shock
- More pH Neutral
- Money Saver
- Swim in 15 minutes
- Residue Free Shock
- Chlorine Shock Replacement
- Chlorine Byproduct Remover
- Reduces Chlorine Usage
- Cleans Pipes of Organics
- Biguanide Pool Converter
- White Water Mold & Pink Slime Treatment
- Winterizing Shock

**2X STRONGER**  
THAN TRADITIONAL  
NON-CHLORINE SHOCK

Use Weekly for best results!

is an enhanced non-chlorine shock that breaks down organic contaminants & chlorine byproducts. Treat your water with a stronger, pH neutral shock that destroys organic waste & combined chlorine while allowing swimming to resume in 15 minutes. Super concentrated OXY SPLASH is safe for use in any pool or spa, saving money & time by treating twice as much water!

### Treatments & Dosages:

#### Enhanced Non-Chlorine Shock:

- to shock oxidize your pool add 8 oz of OXY SPLASH per 10,000 gallons directly to the pool as needed

#### Line Cleaner:

- add 1lb. of OXY SPLASH per 10,000 gallons directly to the skimmer while skimmer is running

*Note: It may be necessary to chemically clean filter media after treatment*

#### White Water Mold & Pink Slime Treatment:

- add 2lbs. of OXY SPLASH per 12,000 gallons directly to the pool. and (1) 3" chlorine tablet to each skimmer. Continue filtering for 48 hours, then chemically clean filter to remove organic debris.
- After treatment maintain a free chlorine residual of ~3.0 ppm for several weeks

*Note: Depending on severity of white or pink deposits, a double dose may be needed*

#### Convert Biguanide Pools to Chlorine:

- prior to conversion ensure water balance, proper filtration, clean filter, & no algae present. Add 2lbs. of OXY SPLASH per 10,000 of water and maintain (1) 3" chlorine tablet in each skimmer during treatment, after 3 days clean filter. Test biguanide levels after 7 days. If biguanides are still present repeat dosage of OXY SPLASH. Once biguanides are no longer present clean filter media and start the low chlorine E-Z POOL® program or sanitizer of choice

#### Enhanced Winter Shock:

- Add 2lbs of OXY SPLASH directly to the pool to oxidize up to 30,000 gallons prior to closing

*Note: OXY SPLASH is compatible with all other winterizing chemicals.*
